Summary

Young and adaptable Full-Stack Web Developer with experience in multiple programming languages, including Python and JavaScript. I specialize in building secure and scalable web applications, implementing secure authentication and session management techniques to ensure the protection of sensitive data. With a strong background in database management and API integration, I am skilled in utilizing tools like Supabase, MySQL, MongoDB, OpenAI, and Facebook Graph API to enhance application functionality. I thrive in collaborative environments, working closely with cross-functional teams to deliver high-quality web applications that meet project needs and exceed user expectations.

Experience

Full Stack Developer
C. Monkey Tribe
Jan 2023 - Present (4 months)
• Leveraged multiple programming languages, including Python, and JavaScript to build a full-stack web solution.
• Implemented secure authentication and session management techniques to ensure secure communication between the server and client.
• Utilized Supabase, to store and manage information for web applications.
• Successfully integrated multiple APIs, including OpenAI and Facebook Graph API, enhance functionality.
• Collaborated closely with cross-functional individuals to design and develop high-quality web applications that meet project needs and user requirements.

Education

Lebanese International University
Bachelor of Science - BS, Computer Science
Oct 2021 - Jul 2024

Skills

React.js • FastAPI • python • JavaScript • Artificial Intelligence (AI) • Supabase • Java • Communication • Collaboration • Problem Solving
